N SERIES LOADER BACKHOES
580N | 580 Super N | 580 Super N Wide Track | 590 Super N

Case Delivers Full-Service Solutions
EQUIPMENT | FINANCING | PARTS & SERVICE
Proven Performance
The new Case N Series loader/backhoes are four tough machines. Re-engineered from the ground up, the new Case loader/backhoes deliver industry-leading backhoe breakout force, increased loader lift capacity/reach and best-in-class cab visibility.

Power Lift
N Series machines out-muscle the competition with as much as 65 percent greater backhoe lift power. With industry exclusive Power Lift, you may not need an excavator on the job. You also can use Power Lift to break through extreme conditions such as a frost line, dry clay or roots. With the flick of a switch, Power Lift adds more capacity than the competition to lift, curl, crane and move objects.

Best-in-class Productivity
The N Series new loader arm design boosts productivity. The loader provides more breakout force and 36 percent greater lift capacity at full height. N Series machines reach deeper dig depths than the previous models. It’s superior overall lift height and reach to dump material into the center of haul trucks with rail extensions eliminates the need to turn trucks away due to height restrictions.

Superior Comfort and Visibility
Day and night, our new cab keeps operators productive. Floor-to-ceiling windows provide superior visibility. New rear-quarter windows provide easy communication to the back of the machine and improve cross-ventilation comfort. The high-intensity lighting package increases saturation by 28 percent, providing superior visibility and overlapping fields of coverage. The ‘easy flex’ side lights offer 45 degree rotation to deliver extra lighting where it’s needed most.

Powershift Transmission Family
The N Series introduces a new transmission family, the Powershift H-type and Powershift S-type, allowing operators to shift from the column. Each transmission provides a standard kick-down feature and introduces the industry exclusive SmartClutch modulation. SmartClutch lets operators customize the transition from forward to reverse to meet the demands of their specific application.

Easy Maintenance
Case is famous for easy ground line daily maintenance. Swing-out coolers are easy to access. Axles, with outboard-mounted wet disc brakes, are serviceable without complete disassembly. Add a flip-up hood, hardened pins and floating bushings, spin-on filters, grouped site gauges, and you’re saving routine maintenance time.
The new Case 580N, 580 Super N, 580 Super N Wide Track and 590 Super N loader/backhoes all feature 4.5-liter, turbocharged engines, ranging from 79 net hp in the 580N to 108 hp in the 590SN.

The N Series extends a legacy of loader/backhoe leadership that began when Case introduced the industry’s first factory-integrated loader/backhoe in 1957.

**Power Lift™ Boosts Backhoe Capacity**

The N Series introduces Case-exclusive Power Lift™ technology, which channels hydraulic power directly to the boom with the touch of a button. As a result, N Series backhoe lifting capabilities outperform competitive models by as much as 39 percent — while running at low engine RPMs.
Side-Lighting Improves Safety, Productivity

Case adds to its leadership in product innovation with a new high-intensity lighting solution for its N Series loader/backhoes. The new lighting package improves illumination by 28 percent, providing superior visibility and overlapping field coverage. The new, “easy flex” side lights offer 45 degree rotation to deliver extra lighting where it’s needed most.

The new N Series machines light up the entire perimeter of the machine. This means the entire side-to-side range of backhoe movement – and beyond – is illuminated. Additionally, the side lights can be focused to the loader side of the machine to maximize applications such as snow removal or grading. This not only gives the operator a better sense of control; it also boosts productivity at any time of day or night.

Transmission, Hydraulic System Improvements

The Case N Series introduces a new transmission family, the Powershift S-Type™, Powershift H-Type™ and Powershuttle. All transmission choices are available on the 580SN, 580SN WT and 590SN. The 580N offers the Powershift S-Type and Powershuttle transmissions.

The two Powershift transmissions include four forward and three reverse gears, and the Powershuttle transmission offers four forward and four reverse gears. The Powershift transmission provides a standard kick-down feature and introduces the industry exclusive SmartClutch modulation. The SmartClutch feature lets operators customize the transition from forward to reverse to meet the demands of their specific loading applications.

A loader/backhoe’s versatility includes the ability to drive to a jobsite. The Case machines can travel at up to 24 miles per hour – and the over-center backhoe design makes travel smoother.

The N Series machines deliver improved cycle times and realize a 10% fuel savings with the Variable Volume Hydraulic (VVH) System. The VVH System operates at a lower temperature than other hydraulic systems. The 580N continues to offer a single gear pump open hydraulic system.

The new Flow Control feature with the auxiliary hydraulic system allows the operator to set the hydraulic flow to match the attachment needs. Additionally, hoses are routed inside of the boom structure of the backhoe to provide greater protection for applications such as demolition. These improvements in hydraulics also help achieve greater fuel efficiency.
Power Lift

Power Lift enables N Series loader/backhoes to lift and move objects that may otherwise require an excavator. Power Lift also lowers RPMs, giving the operator the ability to place objects with great precision while easily communicating with spotters.

Stronger bucket pins

Backhoe bucket pins are larger and stronger to accommodate the improved lift capacities. Combining a single-pin design with an optional hydraulic coupler simplifies attaching and detaching the bucket.

Longer loader arms

The N Series machines have longer loader arms for deeper digging and better reach. This lets operators dump material into the center of a truck for faster loading and increased payloads. Thru-pin design strengthens geometry and rigidity to increase overall powerful design.

High capacity hydraulic flow

The hydraulic system supplies 28 gallons per minute to the loader, with an available high-flow system that produces 40 gallons per minute. With standard flow control, a specific flow can be affected.

Transmission options

The N Series offers the Powershift S-Type™, Powershift H-Type™ and Powershuttle transmission options. All are available on the 580SN, 580SN WT and 590SN. The 580N offers the Powershift S-Type and Powershuttle transmissions.
Openable rear windows
The N Series cabs feature a rear quarter window that opens 180 degrees and locks for excellent cross-ventilation and communication. The window includes a long grab-handle for easy opening and closing. The rear window is in three sections allowing for multiple positioning configurations for varying environmental conditions.

Optimized hose routings
The backhoe boom now has its hydraulic hoses routed within the structure protecting it during demolition and severe duty applications.

4.5 liter turbocharged engine
All N Series machines use this proven Case engine that features a parent metal bore block with an integral oil cooler and automatic belt tensioner. These features add up to longer engine life, greater reliability and easier serviceability.

Ground level maintenance
The N Series loader/backhoes offer Case hallmark ground-level maintenance, including grouped service points and sight gauges for easy daily monitoring.

S boom design
The new backhoe boom adds to the N Series machines’ strength and durability. It stands up to the most grueling applications and working conditions, such as demolition.

Easy-open door handle
Opening the cab door has never been easier, thanks to a new easy-to-open door handle design for all N Series models.

360-degree exterior lighting
The N Series machines all feature high-intensity exterior lighting, including industry exclusive, adjustable side lighting that combines with front and back lighting to provide full 360-degree lighting of the jobsite, greatly improving safety and nighttime productivity.
New Cab Improves Visibility, Airflow, Comfort and Control

Several new comfort and safety features in the N Series loader/backhoes boost operator productivity. Floor-to-ceiling windows provide superior visibility. New rear-quarter windows provide easy communication to the back of the machine and improve cross-ventilation comfort.

As in previous models, the N Series loader/backhoes include comfortable, adjustable operator seats and ergonomically placed controls along with all-season heating and air conditioning systems for increased operator comfort. The N Series cabs are also among the industry’s quietest – at 72 decibels – providing an environment in which the operator can concentrate on the task at hand.

With fully adjustable control columns, armrests and wrist positioners, as well as a footrest, any operator will feel completely in control and relaxed while using the Case pilot control system. With additional machine control features such as PRO CONTROL (swing dampening), Ride-Control (load balancing) or Comfort Steer (reduces lock to lock steering wheel rotation), productivity is second nature in any N Series tractor loader backhoes.
Easy Maintenance and Service

Case knows that the easier it is to perform routine maintenance, the more likely it will get done. A hallmark of Case equipment design is easy ground line access to daily maintenance checkpoints.

The N Series machines offer swing-out coolers that are easy to access. You can service the machine’s axles – equipped with outboard-mounted wet disc brakes – without complete disassembly. The flip-up hood, spin-on filters and grouped site gauges all help reduce routine maintenance time.

Case also has added components that eliminate the need for service, including an automatic belt tensioner, lube-for-life u-joints and hardened steel triple-bushed joints.

Add up all the maintenance and service advantages of the Case N Series, and you get a loader/backhoe that will be productive on the jobsite for years to come.
Increase Productivity With Attachments

Case wrote the book on attachment versatility. In fact, we were the first manufacturer to offer a hydraulic quick coupler on our loader. We’re the only manufacturer to offer an integrated hydraulic quick coupler on our backhoe, and we have engineered that quick coupler so there is no loss of breakout force.

Hydraulic quick couplers let the operator exchange buckets and many attachments without ever leaving the cab. This means you can change buckets with ease or switch from a bucket to forks or other attachment and back again in seconds.

Popular attachments include hydraulic augers, hammers and tampers for the backhoe, and forks, grapples, rakes, brooms, snow blades and combination buckets for the loader. In all, more than two dozen loader attachments are available for Case N Series loader/backhoes.
You can count on Case

You can count on Case and your Case dealer for full-service solutions—productive equipment, expert advice, flexible financing, genuine Case parts and fast service. We’re here to provide you with the ultimate ownership experience.

Case pride

You can take pride in the Case name on your machine. It’s backed by more than a century of productivity and performance. Case and your Case dealer are here for you, not only when you buy the machine, but also after you put 1,000 or 10,000 hours on it.

A rich, proud history

Case Construction Equipment’s heritage spans more than 165 years. Growing from J.I. Case’s innovations with steam-powered machinery in the late 1800s, Case developed road-building equipment that helped create early 20th century streets and highways across the world. By 1912, Case was well on its way to establishing itself as a full-line equipment manufacturer. The company continued to expand its construction equipment business over the next 45 years.

Celebrating a tradition of innovation

In 1957, Case produced the world’s first factory integrated loader/backhoe made and warranted by one manufacturer. Over the decades and into the 21st century, Case has continued to develop a long line of industry firsts and has taken a leadership role in pioneering new products and solutions. Today, Case produces 15 lines of equipment and more than 90 models to meet your toughest construction challenges. Supported by manufacturing and sales in more than 150 countries, Case serves the needs of our customers worldwide.

The Case loader/backhoe history has included a number of important “firsts” — such as the Case-patented Extendahoe extendible dipper stick, return-to-dig and return-to-travel functionality, Ride Control™, side lighting and the Case trademark over-center boom design — that evolved the loader/backhoe into an indispensably versatile fixture in the construction equipment industry.

Coast-to-coast customer support

In North America, Case equipment is sold and serviced by more than 350 dealer locations. No matter where you work, we’re here to support and protect your investment.

To locate a Case dealer or learn more about Case equipment or customer service, go to www.casece.com or call 1-866-54CASE6. For flexible financing options, dependable parts and fast service, your Case dealer is here to meet your needs.

It all adds up. You can count on Case.

### Biodiesel compatibility

Case construction equipment is biodiesel friendly.

Always read the Operator’s Manual before operating any equipment. Inspect equipment before using it, and be sure it is operating properly. Follow the product safety signs and use any safety features provided.

**NOTE:** All engines meet current EPA emission regulations.

**NOTE:** All specifications are stated in accordance with SAE Standards or Recommended Practices, where applicable.

**IMPORTANT:** Case Construction Equipment Inc. reserves the right to change these specifications without notice and without incurring any obligation relating to such change. Availability of some models and equipment builds vary according to the country in which the equipment is used. The illustrations and text may include optional equipment and accessories and may not include all standard equipment. Your Case dealer/distributor will be able to give you details of the products and their specifications available in your area.
